

MAKE THE MOVE TO INDJI WATCH

EXCELLENT CUSTOMER SERVICE

Excellent customer service is increasingly hard to find, but at Indji Systems, it's a top priority. With Indji Systems you'll hear from your Account Manager and our Product Manager. Your feedback is crucial to our efforts in delivering the #1 solution for weather monitoring and alerting to the renewable energy industry. When you come on board with us we'll make sure your staff is trained on Indji Watch and 24/7 customer support will continue afterwards from our global staff.

THE MARKET LEADING SOLUTION

With over 40 major renewable energy customers served in North America, our clients tell us we have the easiest system to use and understand. The interface is clean, intuitive and innovative in how it displays key information. Your employees will embrace it faster than other solutions, increasing the value you receive and leading to smarter decisions.

INNOVATION

Indji Systems has pioneered new capabilities that were not previously delivered such as forecast radar, forecast lightning, Plan of Day and Plan of Week dashboards, in-house icing forecasts and much more. Our solutions are targeted to help you make smarter maintenance planning decisions and increase the safety of your operations, all while maximizing productivity.

INDUSTRY FOCUS

Indji Systems has grown rapidly because we focus on your industry, your needs and the challenges you deal with. Our solutions are driven by what our clients tell us they need. We attend more industry conferences and trade shows than our competitors. Why? Because we want to hear what you have to say, what keeps you up at night and how we can help. Indji Systems does not try to serve 8 or 9 different industries because we, like you, care about renewables and want to serve that industry better than anyone!

EXCELLENT CUSTOMER SERVICE

Because this is so important, we are starting and ending here. Our Product Manager hosts an annual User Group Meeting where our customers spend a day hearing from industry experts, sharing their feedback on Indji Watch, hearing what we have planned and networking with their peers. This meeting drives our innovation and enhancements, deepens relationships and keeps our vendor/client relationship strong. Is your provider doing this for you?
