

RENEWABLES APP

The industry leading Indji Watch solution can be viewed on any smart phone or tablet so no matter where you are critical information about dangerous weather is at your fingertips!

Technicians are on the go and once they leave the for the site, they need to have critical weather information readily available. When there is a threat of an approaching storm or weather event, you want your employees aware of the situation on-site. With the Indji Watch Mobile App, your team will get real-time notifications of advancing hail, high winds, lightning, wildfires and other weather threats. With new updates every minute, your team can choose to leave the site, or continue safely working and finish the job.

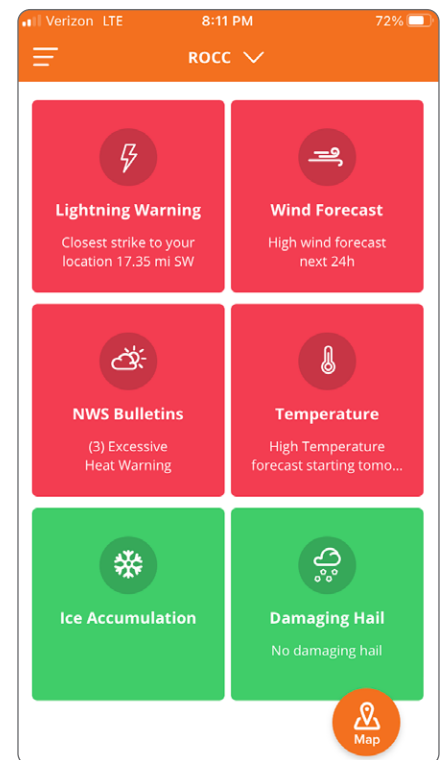

Intelligent Dashboards

By simply taking the phone our of their pocket, the technician can have an instant view of all-weather hazard threats to the site. Tapping on any

tile will reveal more information about the threat such as high wind arrival time, National Weather Service tornado watch details or the threat of approaching lightning. The simplicity and speed of the Indji Watch Renewables app keeps your technicians informed but also quickly returns them to the job at hand.

Stay Mobile with Indji Watch

Wherever you are, your smart phone or tablet is your link to Indji Watch and critical weather information. The Indji Watch Renewables mobile app will help keep your employees safe and help your organization maximize productivity on the job site. A solution that will keep all parties happy.

Real-time Mobile Dashboard Displaying Weather Hazards
