

MAKE THE MOVE TO INDJI WATCH

EXCELLENT CUSTOMER SERVICE

Excellent customer service is increasingly hard to find, but at Indji Systems, it's a top priority. With Indji Systems you will hear from your Account Manager and our Product Manager. Your feedback is crucial to our efforts in delivering the #1 solution for wildfire and weather alerting to the utility industry. When you come on board with us we will make sure your staff is trained on Indji Watch and 24/7 customer support will continue afterwards from our global staff.

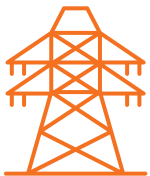

THE MARKET LEADING SOLUTION

With over 260,000 miles of transmission lines currently monitored our clients tell us we have the easiest system to use. The interface is designed for grid operations and maintenance with a grid display and Threat Window that allow your team to know exactly which power lines and substations are under threat. Indji Watch eliminates a lot of the weather data noise of traditional weather services. Your employees will embrace it faster because its clean, intuitive and more innovative in how it displays key information, increasing the value you receive and leading to decisions based on the best information. Indji Watch incorporates all of the tools necessary for faster, and better informed, operations and maintenance planning, natural hazard threat response, and asset damage investigation.

INNOVATION IN NATURAL HAZARD MONITORING AND ALERTING

Since 2008 Indji Systems has patented new capabilities that were not previously delivered such as alerts, with thresholds you set, for wildfires, lightning, extreme winds, icing and river flooding that are specific to your grid assets. Then we supplement this innovation with an Active Satellite Wildfire animation, 9-hour forecast radar, and 9-hour forecast lightning animation tools. Personnel can streamline lightning fault investigation in five easy steps and geolocate any known fault with the Distance to Fault tool identifying the structures and poles for investigation. This targeted, grid specific information is designed to help you make better informed maintenance planning decisions and increase the safety of your operations, all while maximizing productivity.

INDUSTRY FOCUS

Indji Systems has grown rapidly because we focus on your industry, and the challenges you deal with. Our solutions are driven by what our clients tell us they need. We attend more industry conferences and trade shows than our competitors. Why? Because we want to hear what you have to say, what keeps you up at night and how we can help. Indji Systems does not try to serve 8 or 9 different industries because we, like you, care about the utility industry and want to serve that industry better than anyone!

If you need more reasons to make the move please call 650-641-2653 or email info.indjiwatch@indji.net
